PROFESSIONAL SUMMARY

Website Designer and UI/UX Designer with a Bachelor's degree in Website Design and Development and hands-on experience designing and building responsive websites and user interfaces. Experienced in creating cohesive visual experiences, organizing content into user-friendly layouts, refining designs in Figma, and implementing websites with React, HTML, CSS/Sass, and JavaScript. Detail-oriented and collaborative, with professional experience testing user-facing interfaces, incorporating feedback, and performing thorough quality checks.

TECHNICAL SKILLS

Design: Figma • Canva • Adobe Illustrator • Adobe XD • UI/UX • Visual Design • Responsive Design • Accessibility

Web: HTML • CSS/Sass • JavaScript/TypeScript • React • Next.js • Node.js • Express

QA & Workflow: Playwright • UI Testing • GitHub • Scrum • Requirements Translation

PROFESSIONAL EXPERIENCE

Software Engineer Intern | Jun 2024 – Aug 2024 *TELLUS*

- Rebuilt the company dashboard and website in React.js and Material UI, organizing layouts and interface components for a clearer, more user-friendly experience.
- Used Figma to refine page layouts and interface components while maintaining visual consistency across key pages.
- Tested and resolved UI issues to improve responsiveness, usability, and consistency.
- Translated product requirements into polished interface deliverables and incorporated feedback into revisions.

Software Engineer Intern | Jan 2024 – Jun 2024 *NICE CX One*

- Used Playwright and TypeScript to validate front-end behavior and identify UI regressions before release.
- Performed detailed quality checks to verify functionality and reliability of user-facing features.
- Supported faster development iterations by converting end-to-end API tests into mock API tests.

Academic Tutor | Mar 2023 – Jun 2024 *Neumont College of Computer Science*

- Supported students in web development and front-end implementation courses.
- Reviewed projects and helped identify implementation, usability, and quality issues.
- Communicated technical concepts clearly and provided individualized guidance to improve project outcomes.

SELECTED WEBSITE PROJECT

Website Designer & Developer | [Sweet Mystic Bakery](#) — *Personal Business Website*

- Designed and developed a responsive multi-page website for a bakery brand, focusing on cohesive branding, usability, and a polished customer experience.
- Created the Sweet Mystic Bakery logo in Canva and established a consistent visual system of brand colors, typography, navigation, and page layouts.
- Organized products, business information, policies, FAQs, and customer-facing content into clear, accessible pages.
- Built and refined the website using React, HTML, CSS/Sass, and JavaScript with layouts designed for desktop and mobile users.
